Summary

Computer Science student at Bangladesh University of Professionals (CGPA: **3.88/4.00** — top of cohort) with strong expertise in Data Structures, Algorithms, and full-stack development. Shipped 5+ production-grade projects spanning web platforms, product strategy, and algorithm-driven systems. Experience spans both engineering and product domains including SRS writing, market research, and end-to-end product lifecycle management. ICPC 2025 Dhaka Regional Finalist.

Education

Bangladesh University of Professionals (BUP) — Dhaka, Bangladesh
B.Sc. in Computer Science & Engineering — 2023 – Present
CGPA: **3.88 / 4.00** (Top of cohort)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management, Software Engineering, Computer Networks, Discrete Mathematics

Bogura Cantonment Public School & College — Bogura, Bangladesh
Higher Secondary Certificate (HSC) — Science — 2022 — GPA: **5.00 / 5.00**
Secondary School Certificate (SSC) — Science — 2020 — GPA: **5.00 / 5.00**

Technical Skills

Languages: JavaScript, TypeScript, Java, C, C++
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, NestJS
Database: MySQL, Supabase (PostgreSQL)
Tools & Platforms: Git, GitHub, Vercel, Hostinger, Jira, ClickUp, HubSpot, Slack, Google Workspace
Core Concepts: Data Structures & Algorithms, OOP, System Design, REST APIs, Software Engineering
Product: SRS Writing, MoSCoW Analysis, SWOT Analysis, Market Research, Competitive Analysis

Experience

Product Management Trainee — *2024 – Present*
PM Heaven, Dhaka, Bangladesh

- Architected end-to-end **Software Requirement Specifications (SRS)** for enterprise-grade applications, defining functional and non-functional requirements across complete product lifecycles.
- Spearheaded **MoSCoW-based feature prioritization** and competitive analysis for **PetDunia** (live Play Store app), directly shaping its v1 feature roadmap across 12+ prioritized features.
- Led **market research, SWOT analysis, and value proposition design** for active client products — positioning each against direct competitors in the Bangladeshi market.
- Shipped web development contributions and coordinated cross-functional delivery using **Jira, ClickUp, HubSpot, and Slack** across product and engineering teams.

Projects

Routly — routly-rosy.vercel.app
Next.js 15, NestJS, Supabase, TypeScript, Tailwind CSS, Framer Motion

- Engineered a **full-stack student management platform** eliminating fragmented university communication — consolidating class schedules, exam alerts, notices, and study materials into one workspace.
- Built an **AI-powered notice parsing system** that converts raw CR announcements into structured, real-time schedule updates — removing manual coordination entirely.

- Designed scalable SSR architecture with **Next.js 15 App Router, NestJS backend, Supabase real-time subscriptions**, and server-side session protection via middleware.

PetDunia — Product Strategy Play Store

- Drove end-to-end product strategy for a **live pet care app on the Google Play Store**, from market research through feature prioritization.
- Prioritized **12+ features using MoSCoW analysis** and defined product positioning through competitive research — directly informing v1 launch scope.

Homify github.com/AZtheE1/Homify-WebApp
Java, MySQL

- Built a **full-stack property management platform** for landlord–tenant coordination, listings, and payment tracking.
- Implemented **Dijkstra's Algorithm** for proximity-based property search and **0/1 Knapsack** for budget-constrained tenant–listing optimization.

E-Voting System github.com/AZtheE1/E-Voting
Java, MySQL

- Engineered a **tamper-resistant electronic voting platform** with role-based authentication (voter, admin, auditor) and full audit trail support.
- Enforced **zero double-voting** through real-time vote verification and cryptographically consistent MySQL record handling.

PerSonal Brain github.com/AZtheE1/PerSonal-Brain-App
JavaScript, Node.js

- Designed a **personal knowledge management system** for storing and instantly retrieving receipts, notes, transaction records, and photos via full-text search.
- Built as a self-contained personal database — structured for fast retrieval across heterogeneous daily data types.

Achievements & Awards

- **ICPC 2025 Dhaka Regional Finalist** — qualified among top competitive programmers in Bangladesh.
- **Merit-based Scholarship** — Bangladesh University of Professionals (BUP), awarded for academic excellence.
- **Scholarship Recipient** — Sena Kalyan Sangstha, granted on merit.
- **Perfect GPA** — 5.00/5.00 in both HSC and SSC (Science Group), Bogura Cantonment Public School & College.

Leadership & Activities

- **Class Representative (CR)**, Bangladesh University of Professionals — managing faculty–student coordination and departmental communication.
- Active member of **Computer Programming Club, IEEE Student Branch**, and **InfoTech Club** at BUP.

Languages

Bengali (Native) — English (Professional Working Proficiency)
